

Media Activity

To demonstrate your understanding of shot sizes and shot angles, take at least one photo for each of the shot types on the attached worksheet, and place the images in the sheet!

You can take pictures of anything or anyone you would like, but try to imagine how the shot sizes will work on non human objects. For example, what would a Mid-Shot be on a water bottle?

Insert the photos you have taken into the matching shot size below!

Extreme Close Up

Close Up

Medium Close Up

Mid Shot

Long Shot

Low Angle

High Angle

Dutch Angle

Optional: Any other shots you have taken that you are proud of!
